THE NATIONAL CYBER AWARDS 2026
FINALIST
SME CONSULTANCY OF THE YEAR AWARD

MD - Professor Daniel Garnham

Daniel Garnham is a former UK police cybercrime officer with over 20 years' experience investigating serious cyber threats and delivering training to law enforcement worldwide. He is an international cyber security expert, ISO 27001 lead implementor, and recognised trainer for Interpol, the UN, and the Council of Europe.

Daniel has developed degree-level cybercrime programmes which are used in universities as well as having created innovative gamified learning tools. Daniel is a recurring judge for the UK Cyber Outstanding Security Performance Awards.

Daniel is also the founder and General Secretary of the UK's only trade union solely for physical and cyber security, the Security Industry Federation.

GARNHAM
SOLUTIONS GROUP

CONSULTANCY

Garnham Solutions Group offers expert consultancy in GDPR, data protection, cyber security, risk management, compliance and business resilience across the UK.

THE NATIONAL CYBER AWARDS 2026
FINALIST
SME CONSULTANCY OF THE YEAR AWARD

Websites, Domains & Digital Services

Your digital presence is often the first impression customers have of your business. At Garnham Solutions Group, we provide professional website design, development and digital services to help organisations establish, improve and maintain their online presence. Whether you need a brand-new website, a complete redesign of an outdated site or a refresh to improve functionality and appearance, we create modern, responsive and user-friendly websites tailored to your business objectives. Our services also include domain registration and management, website maintenance, search engine optimisation (SEO), business email configuration and ongoing technical support. We combine creative design with technical expertise and a security-conscious approach to deliver websites that not only look professional but also perform effectively, protect your business and help you reach your target audience.

CPD Courses

GSG has teamed up with the Security Industry Federation Trade Union Academy to bring you a comprehensive list of CPD accredited course's for just £35!

With dozens of courses to choose from, continue your professional development with courses in digital skills, health and safety, management, well-being and self development.

GARNHAM
SOLUTIONS GROUP

CYBER

Garnham Solutions Group provides expert cyber security services, including penetration testing, threat monitoring, incident response and cyber investigations.

THE NATIONAL CYBER AWARDS 2026
FINALIST
SME CONSULTANCY OF THE YEAR AWARD

Cyber Awareness & Training Solutions

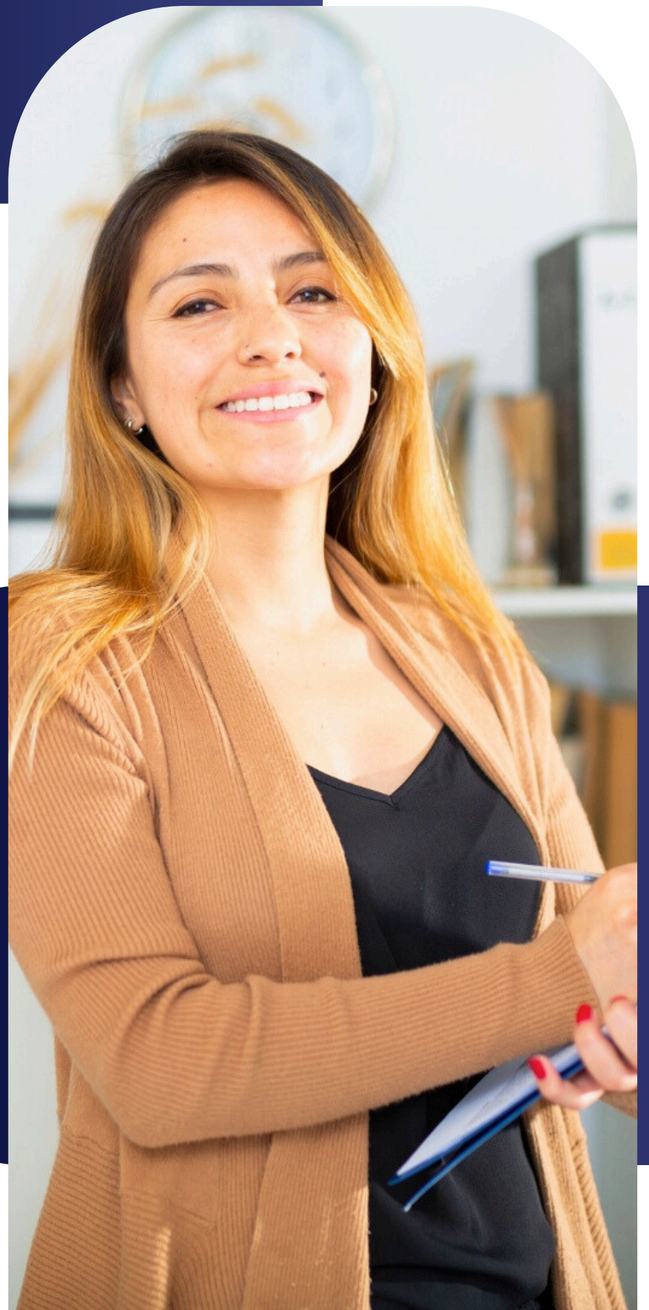

Your staff are both the first line of defence and a significant vulnerability in cybersecurity, as human error often leads to breaches. We offer engaging cyber awareness training to help employees recognise threats and protect the organisation. Key topics such as:

- Password hygiene and credential security
- Phishing awareness and email safety
- Malware and ransomware prevention
- Device and endpoint safety

Delivered through live sessions, e-learning, or custom workshops, the training is tailored to your industry and compliance needs, aiming to change behaviours, not just raise awareness.

Cyber Services & Incident Response

- Penetration Testing & Vulnerability Assessments across infrastructure, web, and mobile environments
- Phishing Simulations & Social Engineering Campaigns to test and train user response
- Incident Response Planning & Live Support for ransomware, malware, and breach scenarios

Cybercrime Investigation & Digital Forensics for Police

Our former UK police cybercrime investigators bring extensive frontline experience in investigating complex digital offences, identifying cyber threats and uncovering critical electronic evidence. Using proven investigative strategies, advanced digital forensic techniques and open-source intelligence (OSINT), we help organisations understand cyber incidents, trace digital activity and establish the facts.

From cyber fraud, phishing and ransomware attacks to insider threats, data breaches and online criminal activity, our specialists provide a structured, intelligence-led approach to digital investigations. We support the identification, preservation, examination and analysis of digital evidence, maintaining its integrity and evidential value throughout the investigative process.

Combining law enforcement expertise with modern forensic technologies, Garnham Solutions Group delivers professional investigative support, actionable intelligence and clear findings to help organisations respond to incidents, mitigate risks and make informed decisions.

Virtual Currency Training

Our Virtual Currency Training equips organisations and professionals with the skills to address threats related to cryptocurrencies and blockchain assets. Led by experienced cybercrime investigators, the course covers virtual currency fundamentals, transaction tracing, wallet identification, dark web markets, and issues like fraud, money laundering, and ransomware. It's designed for law enforcement, financial services, and private sector compliance to navigate digital finance complexities and crypto-related threats.

Key topics include wallet tracing, blockchain forensics, fraud and ransomware typologies, AML methodology.

Open Source Intelligence (OSINT)

Unlock insights from open sources to safeguard your people, assets, and reputation through OSINT investigations. Our services include:

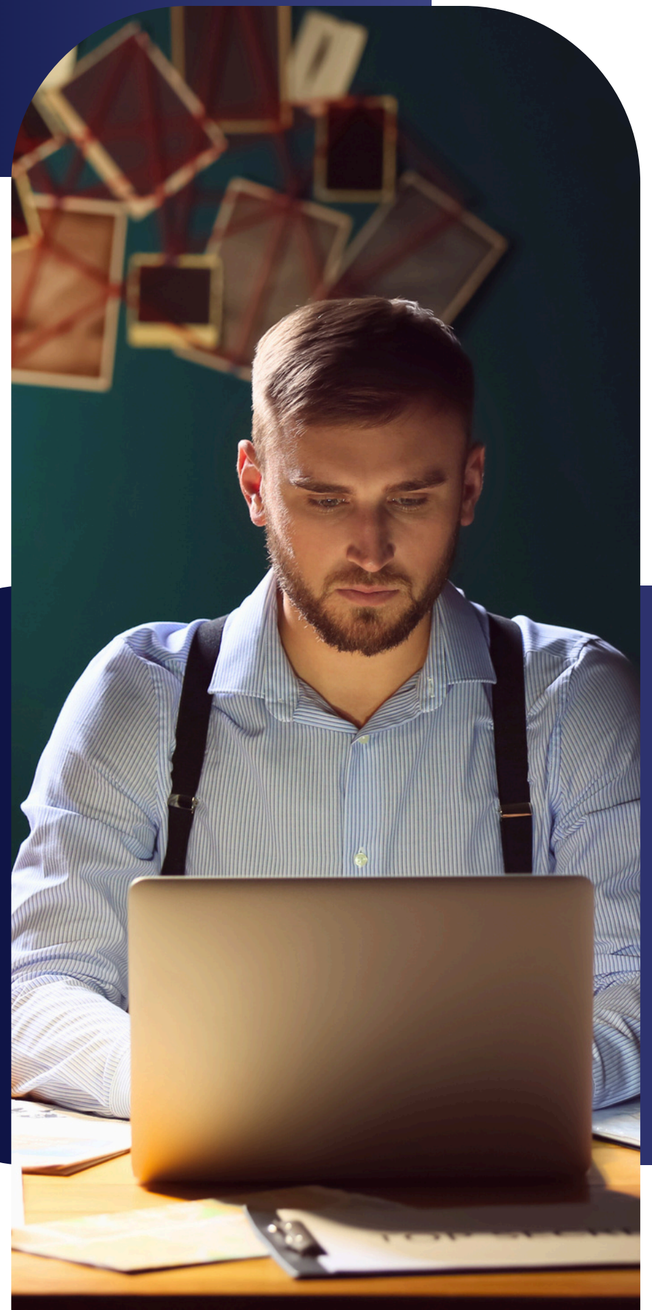

- Awareness training on OSINT tools, techniques, and ethics
- Live demonstrations and workshops on using open data for threat detection
- Threat intelligence gathering, including dark web and social media analysis
- Brand and executive protection to identify digital risks
- Investigative support for due diligence, fraud detection, and insider threats

We provide expertise to help teams turn open data into strategic intelligence, whether you're new to OSINT or enhancing in-house capabilities.

Investigation Tactics Training

Our Investigation Tactics Training is designed for investigators across both public and private sectors, equipping them with the skills needed to conduct robust, ethical, and legally sound investigations. Led by former law enforcement experts, the course covers best practice approaches to interviewing techniques, witness management, evidence preservation, and digital evidence handling. Whether you're investigating internal misconduct, fraud, cyber incidents, or regulatory breaches, this training ensures your team can gather intelligence effectively, document findings professionally, and build cases that stand up to scrutiny.

Micro Learning Videos

Introducing 20 ultra-concise, 2-minute cyber security training videos designed to engage your workforce and enhance awareness. Ideal for any LMS, these videos cover vital topics like phishing, password safety, and social engineering, facilitating easy understanding and action against cyber threats.

- Effective and Time-Saving: Videos fit into busy schedules without disrupting productivity.
- Backed by Science: Micro-learning boosts knowledge retention, ensuring employees remember key information.

Enquire now to create your custom training bundle.

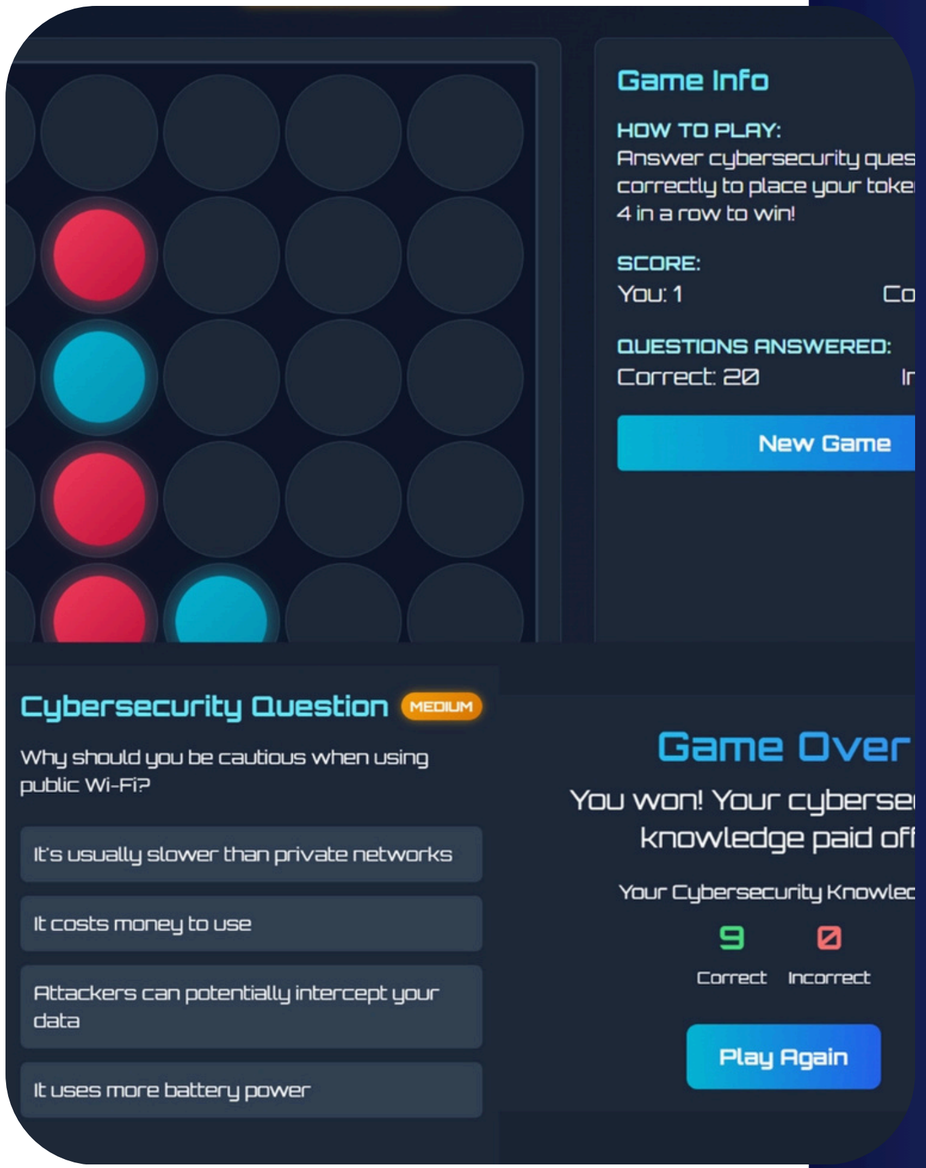

Gamified Learning & Tabletop Exercises

- Online cyber awareness games, where users learn through play, earning points, solving challenges, and building real knowledge

- Tabletop incident simulations challenge participants to respond under pressure, build business continuity resilience, and identify gaps in real time

Gamified learning isn’t just more enjoyable, it’s proven to boost retention, teamwork, and drive cultural change.

Cyber Awareness for Pupils and Teachers

Our advanced DBS checked trainers deliver bespoke courses to pupils of all ages and teachers in combatting harmful online content, scams and protecting your personal details.

Our training includes:

- Gamified learning
- CPD accredited online courses for teachers
- Workshops
- multi day Safety Squad scenarios

We have experience in delivering to schools and football clubs across the world!
